

Begin Your Path to a Lucrative Career

From cereal boxes to 3D structures and even parts for the International Space Station, the Bachelor of Science in Design and Drafting Technology (CADD) at the University of Central Missouri prepares you for an in-demand career that is both technical and creative. With this degree, you will be qualified to work in nearly any field of architecture, engineering and manufacturing. Our graduates are highly successful, and here's why:

- The need for design and drafting professionals has grown, and employers actively recruit UCM students.
- Almost all UCM CADD students receive full-time job offers before they graduate.
- The average starting salary for UCM CADD graduates is \$50,000+.
- Some courses are conveniently offered at both our Warrensburg and Lee's Summit campuses.
- Some courses are also offered online for added flexibility.

- Architectural design/drafting
