Seniors

Endnotes

- a.
- b.
- c.
- d.
- e.
- f.
- g.
- h. Standard error of the mean for ordered and continuous variables and standard error of the proportion for items indicating "Done or progress" (High-Impact Practices). The 95% confidence interval is equal to the sample mean plus or minus 1.96 times the standard error of the mean.
- i. A measure of the amount individual scores deviate from the mean of all the scores in the distribution.
- j. Degrees of freedom used to compute the tests. Values differ from Ns due to weighting and whether equal variances were assumed.
- k. Statistical comparisons are two-tailed independent t-tests or z-tests. Statistical significance represents the probability of observing the results if the null hypothesis is true.
- l. Mean represents the proportion who responded "Done or in progress" or "Yes."
